BULBS AND BULBOUS PLANTS FOR 1928

It will always be our endeavour to supply the very best Bulbs, true to the description given in this catalogue, but it is a condition of sale of all Bulbs sent out by us, that, though we give you our assurance that we are using all reasonable care in the selection, we accept no responsibility in regard to the crop or failure of crop. All orders are booked on the understanding that these conditions are agreed to and we also notify to the same effect on the invoice. If the conditions are not acceptable to you the goods should be returned at once.

Quotations are without engagement, but where the price is mentioned on the order we will refer back for confirmation if an increased rate has to be charged. If we fail to do this, the goods can be returned if the price is not approved.

When we are unable to supply the exact variety ordered, we use our best judgment as to substituting other varieties. Any such substitutions are always made with a due regard to season, locality and other conditions so far as known to us.

The substituted varieties are sent for your approval, and while we hope and feel sure you will agree to what we have done with a desire to serve your best interests, you are at liberty to send back any such goods and we will promptly credit you with their value.

**FIVE PER CENT. CAN BE DEDUCTED IF CASH IS SENT
WITH ORDER.**

Finest Mixture of All Daffodils		—	2/6
	We supply an excellent assortment from our fine collection.	Per 100 17/6	

GLADIOLI.

In this section we are listing a very fine range of all the most popular hybrid types as well as a choice range of individually named varieties of fine exhibition type. There is no more satisfying hobby than the cultivation of these intensely beautiful flowers and in South Africa they thrive as they do nowhere else for it is the home of numerous native species and the climate is quite suitable.

GLADIOLI.

In over-seas catalogues most of the dwarf types are described as "early-flowering," but we think the term misleading for South Africa and from our experience we would suggest that most of the dwarf varieties will be found useful for spring planting to flower in summer after the larger types have finished blooming, thus providing a longer flowering period for these popular plants.

			Price	each	doz.
Alice Tiplady	... <i>Primulinus Hybrid</i>	1/3	12/6		
	Beautiful orange-saffron, splendid for cut-flower.

Hecate	<i>Regelio-Cyclus</i>	3/-	—
	Upper petals soft rosy white, lower petals veined brown and bronze on a silvery ground.		

IRISES.

			Price each	doz.
Hera	...	<i>Regelio-Cyclus</i>	3/-	—
	A beautiful ruby red	shaded bronze-blue.		
Isis	...	<i>Regelio-Cyclus</i>	6/6	—
	Ruby red with grey	and purple veins, very		
	large.			
Parthenope	...	<i>Regelio-Cyclus</i>	1/6	—
	Lilac and white, veined	purple.		
Psyche	...	<i>Regelio-Cyclus</i>	4/-	—
	Silvery white ground,	brown veining.		
Saturnus	...	<i>Regelio-Cyclus</i>	2/-	—
	Light violet, veined	purple and netted		
	silver-grey.			
Una	...	<i>Regelio-Cyclus</i>	2/6	—
	Dark brown with violet	veining.		

Miscellaneous.

Alcazer	...	<i>Squalens</i>	2/-	18/-
	Light blue and bronze.			
Dalmatica	...	<i>Pallida</i>	2/6	—
	(Princess Beatrice).			
Florentina	...	<i>Barbata</i>	6d	4/-
	Large white, sweet scented, tall	grower.		
	Per 100	25/-		
Gigantea	...	<i>Beardless</i>	6d	2/6
	(Ochroleuca).	Bright yellow, very tall		
	grower.	Per 100	15/-	
Purple King	...	<i>Germanica</i>	9d	7/6
	(Atroviolacea).	Purple-violet.		
Stylosa Alba	...	<i>Beardless</i>	1/9	17/6
	Winter-flowering, white.			
Stylosa, Mauve	...	<i>Beardless</i>	3d	1/6
	A beautiful Algerian Iris of dwarf habit,			
	grass-like foliage, lovely mauve flowers on			
	slender stems up to 12 inches, autumn-flow-			
	ering.	Per 100	10/-	

LILIUMS.

		Price each doz.
Lilium Candidum ... <i>Madonna Lily</i>	2/6	25/-
A truly elegant bloom, pure white.		
Lilium Henryi ...	3/6	—
Beautiful bright orange, produces a large number of flowers to a stem, height 3 to 6 feet or more.		
Lilium Longi-florum Formosum <i>White Japanese Lily</i>	2/6	25/-
Pure white, sweetly scented, a number of large trumpet-shaped flowers carried on a tall stem.		
Lilium Speciosum Album	3/-	—
One of the most beautiful Japanese Lilies in cultivation, large open flowers with recurved petals, 2 to 3 ft. stems.		
Lilium Speciosum Rubrum	3/-	—
This differs only in colour from the "Album" variety, having red or purplish suffusions and blotches.		
Lilium Tigrinum Flore Pleno	1/-	9/-
The double Tiger Lily, scarlet-orange.		
Lilium Tigrinum Sinense <i>Tiger Lily</i>	1/-	9/-
Deep orange-red flowers, heavily blotched stems 2 to 4 ft.		
Bulb Orders are executed at AYRES' NURSERIES, ROSEBANK, CAPE.		

RANUNCULUS.

			Price each	doz.
Alexander Dumas	... French		3d	1/6
	Scarlet, shaded orange.	Per 100	8/6	
Belladonna	... Scotch		6d	2/6
	Violet striped.	Per 100	18/6	
Emperor of China	... French		4d	1/6
	Pure yellow.	Per 100	7/6	
Fire Ball	... Persian		3d	1/6
	Vermilion, large flower.	Per 100	10/-	
Galitzin	... Scotch		6d	2/6
	Yellow striped brown.	Per 100	18/6	
Grandiflora				
	(Grootvorst)	Turban		2/-
	Carmine.	Per 100	15/-	
Hercules	... Turban		4d	2/-
	White.	Per 100	15/-	
Hertog Karel	... Scotch		6d	2/6
	Violet striped.	Per 100	18/6	
L'Etincelante	... French		3d	1/6
	Scarlet.	Per 100	10/-	
Maria Catharina	... French		3d	1/6
	Light pink.	Per 100	10/-	
Merveilleuse	Turban		4d	2/-
	Yellow.	Per 100	12/6	
Orange Brilliant	... Persian		3d	1/6
	Deep yellow, tinged orange, black centre.	Per 100	10/-	
Romano	... Turban		4d	2/-
	Scarlet.	Per 100	15/-	
Seraphique	... Turban		4d	2/-
	Citron.	Per 100	15/-	

Bulb Orders are executed at
AYRES' NURSERIES, ROSEBANK, CAPE.

RANUNCULUS.

			Price each	doz.
Vermilion Brilliant	... French	3d	1/6	
Vermilion-red.		Per 100 8/6		
Viridiflora	... <i>Turban</i>	4d	2/-	
Scarlet with greenish centre.		Per 100 15/-		
		Price doz.	100	
French , Finest mixed		1/-	6/6	
Turban , Finest mixed		1/6	10/-	

WATSONIAS.

		Price each	doz.
Adelaide	... <i>Cronin Hybrid</i>	1/-	9/-
Orange-scarlet.			
Brighton	... <i>Cronin Hybrid</i>	2/-	18/-
Purple.			
Brisbane	... <i>Cronin Hybrid</i>	2/-	18/-
Bright crimson-scarlet.			
Caulfield	... <i>Cronin Hybrid</i>	1/-	12/-
Delicate pink.			
Hobart	... <i>Cronin Hybrid</i>	2/-	18/-
Good white, late flowering.			
Lasciniator	... <i>Cronin Hybrid</i>	1 6	12/-
White with fringed edge.			
Lorne	... <i>Cronin Hybrid</i>	1/-	9/-
Rose-pink with deeper throat.			
Melbourne	... <i>Cronin Hybrid</i>	4d	2 6
Shell pink, deeper throat.			
Perth	... <i>Cronin Hybrid</i>	1/-	9/-
Dwarf shell-pink.			
Pretoria	... <i>Hybrid</i>	4d	3/-
Mauvy pink shading to magenta.			
Sydney	... <i>Cronin Hybrid</i>	4d	2 6
Mauve, deeper edge.			
Victoria	... <i>Cronin Hybrid</i>	1/6	12/-
Deep red, long tube.			

WATSONIAS.

	Price each	doz.
Watsonia Aletroides	4d	3/-
A very beautiful narrow-tubed species, quite distinct from any other Watsonia, bright scarlet.	Per 100 20/-	
Watsonia Angusta ... "Scarlet"	3d	1/6
Gives a very fine spike of scarlet flowers.	Per 100 7/6; 1,000 60/-	
Watsonia Brevifolia "Rose-pink"	6d	4/6
Watsonia Iridifolia ...	3d	1/6
A very pretty species with characteristic flowers, greenish ivory colour on opening changing to cream.	Per 100 10/6	
Watsonia Marginata	6d	4/6
A fine species with beautiful delicate pink flowers on a very tall stem.		
Watsonia Meriana ... "Suurknol"	3d	1/6
Narrow-tubed flowers of a delicate crushed strawberry shade. Colour is somewhat variable in this species.	Per 100 7/6; 1,000 60/-	
Watsonia Rosea ...	3d	1/6
The Pink Watsonia of Table Mountain, very showy.	Per 100 7/6; 1,000 60/-	
Watsonia Rosea var. Alba	3d	1/6
Arderne's Watsonia. This is a beautiful white Watsonia, introduced into cultivation by the late Mr. H. M. Arderne.		
	Per 100 7/6; 1,000 60/-	

Bulb Orders are executed at
AYRES' NURSERIES, ROSEBANK, CAPE.

CLIVIA HYBRIDS.

MISCELLANEOUS.

		Price each	doz.
Agapanthus	<i>African Lily</i>	9d	7/6
	Magnificent umbels of blue flowers, veined lighter blue, borne on a tall scape. A very striking plant. Also a white variety.		
	Per 100 50/-		
Amaryllis Belladonna	<i>March Lily</i>	9d	6/-
	Bears six to twelve sweetly scented funnel-shaped flowers on a tall stem, colour varies from almost white to deep pink. Per 100 42/-		
Antholyza Praealta ...	<i>Cape Antholyza</i>	3d	1/-
	Showy orange-red blooms, well above the foliage. Thrives in shady positions, but the best blooms are produced in the open.		
	Per 100 5/-; 1,000 42/-		
Aponogeton			
	Distachyon <i>Cape Pondweed</i>	9d	7/6
	Sweet-scented white flowers during winter, leaves float on the surface of the water.		
Babiana, Purple Self		4d	2/-
	A striking variety.	Per 100 12/6	
Babiana Stricta ...		4d	2/-
	Light blue.	Per 100 12/6	
Babiana Stricta ...	<i>"Sulphurea"</i>	4d	2/-
	Milk-white, fine blooms.	Per 100 12/6	
Babiana, Mixed ...		—	1/6
	Splendid mixture.	Per 100 10/6	
Begonia ...	<i>Tuberous</i>	—	—
	From January onwards beautiful flowering specimens are on view at Ayres' Nurseries , Rosebank. In pots, 2/6 and 3/6 each.		
	Dry bulbs later, 1/- each, 10/- doz.		

GLOXINIAS.

MISCELLANEOUS.

		Price each	doz.
Clivia Hybrids	...	3/6	—
	Beautiful funnel-shaped flowers borne in umbels on a stout stem, very striking colours in deep yellow and orange. Larger specimens 5/- and 7/6.		
Crinum Longifolium		2/-	18/-
	Gives 6 to 8 large white flowers usually flushed with red, on a strong stem.		
Cyclamen	... <i>Hybrids</i>	—	—
	We have a fine collection of these beautiful pot plants. Flowering specimens, in season, in pots, 2/6 to 5/- each; dry corms, 1/- each, 10/- per doz.		
Cyrtanthus		3d	2/-
	(Ifafa Lily)		
	Pretty bulbous plants from Natal having tubular flowers produced in umbels on a slender stem.		
Dahlias	...	—	—
	Special list issued in season.		
Dierama Pendula	...	6d	4/6
	Soft rosy-white funnel-shaped flowers drooping gracefully from threadlike stalks carried on a tall flower stem, a charming plant.		
Eremurus Himalaicus		3/6	—
	Erect spikes of beautiful white flowers on a stout stem 5 ft. or more in height.		
Freesia Fergusonia ...		4d	2/-
	Variable shades of yellow. Per 100 12/6		
Freesia Refracta	...	—	1/-
	The sweetly scented blooms are produced in great profusion. Per 100 6/-; 1000 50/-		

IXIAS.

MISCELLANEOUS.

		Price each	doz.
Gloxinia	... <i>Hybrids</i>	—	—
	A beautiful plant for pot culture. Flowering specimens in season, in pots, 3/6 to 5/- each; dry corms, 1/- each, 8/6 doz.		
Haemanthus			
	Coccineus <i>Maartbloem</i>	2/6	25/-
	Umbels of bright red flowers produced in early autumn before the leaves appear.		
Hemerocallis	... <i>Day Lily</i>	6d	3/6
	“Double Orange.” The flowers are not lasting, but very pretty and of a striking colour.		
	Per 100 25/-		
Hemerocallis	... <i>Day Lily</i>	6d	3/6
	“The Monarch.” A beautifully clear orange-yellow, single flower, opens out well and lasts longer than other varieties. Per 100 25/-		
Hippeastrum <i>Hybrids</i>		2/6	—
	Magnificent trumpet flowers, usually about four on a tall stout stem, gorgeous colours, commonly called “Amaryllis.”		
Ixia <i>Æthiopica</i>	...	4d	2/-
	Yellow and red, smaller and later flowering than “ <i>I. maculata</i> .” Per 100 12/6		
Ixia <i>Rosea</i>	... <i>Rose-pink</i>	4d	2/-
	Taller and a shade lighter than “ <i>Ixia patens</i> .” Per 100 12/6		
Ixia	... <i>Kalossie</i>	4d	2/-
	Finest mixture. Per 100 12/6		
Kniphofia <i>Alooides</i>	... <i>Red Hot Poker</i>	1/-	9/-
	Gives a striking Aloe-like spike of red and yellow tubular flowers on long stems, more robust than “ <i>Kniphofia rufa</i> .”		
Kniphofia <i>Rufa</i>	... <i>Red Hot Poker</i>	1/-	9/-
	The stems are more slender, giving the flowers a more artistic appearance than “ <i>K. Alooides</i> .”		

MISCELLANEOUS.

		Price each	doz.
Lachenalia Pendula...		1/-	10/-
Orange-red, tipped with green and purple.			
Lapeyrouisia	Corymbosa	3d	1/6
Gives a dense corymbose panicle of bright violet flowers, very beautiful. Per 100 10/6			
Leucojum	Snowflake	3d	1/-
Pretty white bell-shaped flowers tipped green, six or more on a scape about 1 ft. long.			
Per 100 4/6; 1,000 40/-			
Montbretia Mixed	...	3d	2/-
Mostly orange and scarlet shades; very graceful flowers for vase decoration.			
Per 100 12/6			
Moraea Iridioides	...	2/-	—
Iris-like flowers opening successively on a tall stem, thus remaining in bloom for a long time.			
Nerine Alba	...	2/6	—
A beautiful and free-flowering white Nerine.			
Nerine "Pink"	...	1/-	10/-
A pretty variety of this beautiful flowering bulb.			
Nerine Sarniensis	...	1/-	10/-
Bright red, sparkling bloom. Per 100 75/-			
Nerine Undulata	...	1/-	10/-
A pretty species with rather small pink flowers, with crimped (undulated) petals; unlike "N. sarniensis" the flowers appear with the leaves.			
Ornithogalum	Arabicum	3d	1/6
The shining black ovary surrounded by the yellow anthers and creamy white petals make this a conspicuous flower. Per 100 8/6			

MISCELLANEOUS.

		Price each	doz.
Ornithogalum Lacteum		4d	2/6
	“Darling” Chinkerichee. Gives a nicer bloom than the “Cape” variety, produced a few weeks later.	Per 100 15/-	
Ornithogalum		3d	1/6
	Thrysoides		
	“Cape” Chinkerichee.	This is the early- flowering variety.	Per 100 8/6
Ornithogalum		4d	2/6
	Umbellatum		
	This species is known in Europe as “Star of Bethlehem.”		
Pancratium	... <i>Spider Lily</i>	9d	7/6
	White. The stamens are attached to a delicate cup-shaped membrane, while the long narrow petals dangle below.	Per 100 50/-	
Scilla Campanulata	... <i>Spanish Bluebell</i>	3d	1/-
	Beautiful bell-shaped flowers on slender scapes about 12 inches high, various shades.	Per 100 5/-	
Sparaxis	... <i>Mixed</i>	3d	1/3
	Beautiful Freesia-like flowers in various colours.	Per 100 7/6	
Sparaxis Grandiflora		3d	1/6
	var. Liliago		
	Pure white with a black spot at the base of each petal and flushed with claret-purple outside, very fine.	Per 100 10/6	
Sparaxis Grandiflora	“ <i>Cream</i> ”	3d	1/6
	A delightful shade and gives a very nice spray, useful cut-flower.	Per 100 10/6	

Bulb Orders are executed at
AYRES' NURSERIES, ROSEBANK, CAPE.

MISCELLANEOUS.

		Price each	doz.
Sparaxis			
	Streptanthera "Tangerine"	3d	1/6
	A beautiful Sparaxis of splendid form and lovely soft shade of tangerine. Per 100 10/6		
Sprekelia			
	Formosissima	1/3	12/-
	A brilliant scarlet Amaryllid of exquisite form and very easy to grow in pots or open ground. Per 100 80/-		
Strelitzia Reginae ... <i>Crane Flower</i>		3/6	—
	A peculiar flower resembling a crane's head, blue and gold tinted orange with a green sheath, a striking combination.		
Tritonia Deusta ...		4d	3/-
	Orange-yellow with dark blotch.		
Tritonia Hyalina ...		4d	2/6
	Salmon-pink Tritonia. We consider this the most beautiful of the Tritonias. Per 100 15/-		
Tritonia Lineata ...		—	6d
	The Veined Tritonia. A strong grower and flowers freely. Per 100 3/6; 1,000 30/-		
Tritonia Squalida ...		4d	2/6
	Rosy pink, variable. Per 100 15/-		
Tritonia ... <i>Mixed</i>		4d	2/-
	Per 100 12/6		
Tulips ...		1/3	10 6
	A few acclimatised bulbs, various colours, Darwin type.		
Zephyranthes Candida <i>Swamp Lily</i>		—	6d
	The pretty white flowers among the narrow dark green leaves make a fine show in mid- summer. Per 100 3/6; 1,000 30/-		

**Bulb Orders are executed at
AYRES' NURSERIES, ROSEBANK, CAPE.**

NOTES ON THE CHARACTERISTICS AND CULTIVATION OF SOUTH AFRICAN BULBOUS PLANTS.

Although South African plants have long been cultivated in Europe, and especially during the latter half of the eighteenth century, we are only just beginning to realise the horticultural possibilities of our native flora. And none too soon—for several of our rarest and most beautiful species are in danger of becoming extinct on account of our apathetic attitude towards the wholesale destruction of our wild flowers through indiscriminate and unorganised plucking and selling.

At present there are unmistakeable signs of a re-awakening of interest in South African plants. American horticultural magazines publish "special" articles, profusely illustrated, on the cultivation of various South African Irises of which many of our gardeners have never heard! In this movement we should take a proud and active part. The splendid work being done by the National Botanic Gardens at Kirstenbosch in the preservation of our flora and in experimental work on their cultivation deserves the recognition and encouragement of the ever-increasing body of enthusiastic growers of South African plants. In this connection the annual Journals of the Botanical Society, which exists to help Kirstenbosch, are full of valuable information, while, also under the auspices of the Society, demonstrations in gardening are held on the third Saturday afternoon in each month.

The following notes are limited to such of our native plants as appear in this catalogue.

South African Bulbous Plants.

The term "bulbous," although more restricted in its botanical use, is applied generally speaking to all plants which have an underground root-stock for the purpose of storing food, commonly for use during the resting period when the plant dies down above ground. This underground rootstock is known as a "corm" when the stem has become modified as the storage organ. Plants possessing corms which appear in this Catalogue are Gladioli, including Africanders and Painted Ladies, Ixias, Watsonias, Antholyzas, Babianas, Dierama, Freesia, Sparaxis and Tritonias.

These all belong to the Iridaceae or Iris family, as can be seen by their possession of the following floral characters:—

- (a) parts arranged in threes.
- (b) inferior ovary.
- (c) a single row of three stamens.

Gladioli may be distinguished from other Irises by several characteristics e.g.,

- (a) The flowers are arranged in spikes.
- (b) The stigmas are unbranched.
- (c) The bracts (protecting the flower) are herbaceous.
- (d) The flower-segments are not all alike.
- (e) The tube of the flower is funnel-shaped.

Ixias again have membranous bracts, the flower segments alike and a narrow tube suddenly widening into a bowl.

The more familiar Watsonias are easily recognisable and have their stigmas two-branched.

Antholyzas are easily confused with Gladiolus and Watsonias, except that these not only have unbranched stigmas but a narrow tube, suddenly becoming cylindrical and irregular flower-segments.

Babianas can always be recognised by their fan-folded leaves.

South African Bulbous Plants.

In *Dierama* the flower is bell-shaped and the bracts membranous.

Freesia, like *Watsonia*, has the stigma branched, but instead of the spike being vertical it is here horizontal.

Sparaxis has membranous bracts very much lacerated, while in *Tritonia* the bracts are not lacerated.

When leaves or the bases of leaves are modified to form a storage organ the rootstock is known as a bulb, e.g. *Amaryllis Belladonna* or March Lily, *Crinum*, *Cyrtanthus*, *Haemanthus*, *Nerine* and *Vallota* or Knysna Lily, belonging to the *Amaryllis* family or *Amaryllidaceae*, and *Galtonia*, *Lachenalia* and *Ornithogalum* or Chinkerichee which belong to *Liliaceae*.

Amaryllids may be distinguished from *Irids* by the possession of two rows of three stamens, while in the *Liliaceae* not only are both rows of stamens present but the ovary is superior.

The flowers and leaves of *Crinum* appear at the same time, while those of the *Belladonna* come at different seasons. In both these *Amaryllids* the fruit contains one or a few seeds only, while in *Nerine*, *Vallota* and *Cyrtanthus* the seeds are numerous. The petals of *Nerine* are free while those of *Vallota* and *Cyrtanthus* are partly joined to one another. In *Vallota* the tube is comparatively wider and longer than in *Cyrtanthus*. The fruit of *Haemanthus* is a berry.

Galtonia has angular seeds while those of *Lachenalia* and *Ornithogalum* are rounded. The Chinkerichee is found in vlei ground while *Lachenalias* prefer sandy or rocky situations.

When the root is swollen with reserves of food the rootstock is called a tuber. Such are *Aponogeton*, a

South African Bulbous Plants.

water-plant, the magnificent Gloriosa Lily and Satyrium, an orchid.

When the storage organ is a creeping underground stem it is known as a rhizome, e.g. the Arum and *Moraea iridioides*; one of the few Irids without a corm.

Clivia, Agapanthus, the Red Hot Poker and Strelitzia have imperfect bulbs with thickened roots. They are perennial herbs and do not die down above ground during drought.

The bulbous plants here quoted may be roughly divided into

- (a) those which can be taken up and stored and
- (b) those best left in the ground.

As a general rule it is more advantageous to store such bulbous plants as have a *definite* resting-period; for this not only lessens the risk of damage from the rodent mole or Blesmol, but also gives the gardener an opportunity to cultivate and improve his soil.

Arums are readily adaptable and in favourable situations do not die down above ground. It would also be hardly practicable to dig up their creeping rhizomes. Agapanthus and others of the perennial type are best left in the ground and only lifted for division when new shoots have been formed. The late-flowering Watsonias are also best treated in this way, and such bulbous plants as are moisture-loving, e.g. *Gladiolus tristis*, or flower in the dry months, e.g. a few species of Antholyza and Gladiolus need similar treatment.

Those plants with underground rootstocks which enable them to have a dormant period during the dry months are of two kinds, according as they originate from the winter or

South African Bulbous Plants.

summer rainfall areas. When such plants are transposed to the reverse conditions it becomes, as a rule, more necessary to take up the rootstocks in order to get the best results. It will be readily seen that a plant from the Eastern Province, accustomed to remain dormant during a cold dry winter, would not thrive if left underground in the Western Province where we have heavy rain at that season.

Summer-flowering are several species of *Gladiolus*, *Watsonias* and *Tritonia*, *Gloriosa*, *Crinum*, *Vallota* and *Freesia*.

Winter-flowering are *Moraea*, *Ixia*, species of *Watsonia*, *Gladiolus* and *Antholyza*, *Babiana*, *Dierama*, *Freesia* (when transferred to the Western Province and planted in April), *Lachenalia*, *Satyrium* and *Sparaxis*. Many of these are more truly early Spring-flowering but may be classed with the Winter-flowering for horticultural purposes.

The majority of our larger ornamental Amaryllids are characteristically Autumn-flowering, e.g. *Amaryllis*, *Haemanthus* and *Nerine*. As they rest during Summer drought, they may be treated on the same lines as the Winter-flowering.

The fact that so many of our South African plants are extremely local in their distribution prepares us for their need of individual conditions. But once established in well-drained and suitable surroundings the majority amply repay any thoughtful attention.

Arums do well in marshy ground near streams or in fairly shady woods.

The brown Africander is partial to flats or hillsides and can stand a considerable period of drought.

Painted Ladies need a slightly more secluded spot, but as a rule are also found on hillsides or the more gravelly portions of the flats.

South African Bulbous Plants.

Watsonias as a rule are hardy, doing well on gravelly soil or brown sandy loam. The Summer-flowering species seem to favour less arid conditions.

Agapanthus are suitable for almost any garden soils, some of the large varieties being successful even in very sandy soil.

Belladonnas prefer shady spots and appear to great advantage planted beneath oaks.

Antholyzas need varying treatment according to their species.

Babianas are partial to very sandy soils.

Cyrtanthus according to the species, may need a fairly moist situation, e.g. *Cyrtanthus obliquus* where the leaves remain green all the year round. A fairly rich loam is favourable for these Amaryllids.

Crinum, which also does not die down, requires similar conditions.

Dierama can be grown on a sandy loam with a fair amount of humus. It is an exceedingly graceful plant and eminently repays a little cultivation.

Gloriosa should be planted in situations where it can twine over trellises or trees, etc. Its striking and handsome flowers will then be seen to best advantage. It needs a certain degree of moisture, being a forest plant.

Haemanthus is found near the coast on sandy mountain slopes. The species quoted has a pair of large flat green leaves which appear in Winter.

Ixias are partial to dry sandy soil, and in such situations are fairly easily grown.

Lachenalias are found either near sandy flats or among rocks whence they derive their name of "Klip Kalossies." They make very fine pot plants.

South African Bulbous Plants.

Ornithogalums are partial to vlei ground, but do well even in fairly sandy spots.

The Satyrium quoted can be grown in extremely sandy soil.

Sparaxis like Ixias are hardy and can be given similar treatment.

The Red Hot Poker prefers slightly shaded positions as the leaves are evergreen.

Tritonias for the most part can be planted in fairly dry situations, though they do well in more rich sandy soil, especially *Tritonia hyalina*.

Vallota needs shade and careful handling. It makes an ornamental pot-plant.

The larger Gladioli are already famous, but the slender, more graceful species are set off in all their daintiness by green lawns and a grassy back ground.

The majority seed freely, and once in cultivation can soon with proper care be produced in sufficient quantity for mass effects. After the first rains the seeds are sown, and as transplanting should not take place before a fair-sized root-stock has been formed, it is advisable to have them a fair distance apart from the outset. The Summer-flowering species are sown in Spring.

These are only a few of the treasures to be found among the almost inexhaustible store of our native plants. Many of the smaller flowers such as the Golden Stars, the Romuleas and Galaxias though not yet generally known would be most effective when massed or in cobbled paths as may be witnessed in the Spring or Autumn at Kirstenbosch.

The Babianas make vivid borders, while the taller and hardier Antholyzas and Agapanthus, etc., would grace the stateliest of terraces and avenues.

A FIELD OF DAFFODILS AT AYRES' NURSERIES.
